Full SC-CL
NELL23K | actual training-negative diagnostics
a
Relation-profile similarity
Negative slots (%)
Raw structure similarity
b
Frozen B1 difficulty
Negative slots (%)
Cached pairwise confusion
c
Joint selection lift
B1 hardness percentile
Structure percentile
log2 lift
d
Question-level paired differences
Fraction of questions
Full minus Uniform (observed)
Full minus Quota-matched
Paired mean hardness percentile difference
K = 9; seed = 2026. Each question contributes equal mass.
Uniform and quota-matched curves use the completed, aligned control banks.
Frozen B1 scores describe candidate generation; they are not final SC-CL predictions.
